- Ultimaker cura 4.13.1 for 3D printing
- Microcontrollers and microcomputers: Arduino, RaspberryPi, Lego Mindstorms/EV3/Boost

LANGUAGES

- Italian (mother tongue)
- Spanish (mother tongue)
- English (fluent)

💼 WORK EXPERIENCE

BACKEND DEVELOPER
2023 - PRESENT
New Genesys SRL – Cremona, Italy

HR Management System Development
- Development of an HR management platform.
- Integrated OpenAI APIs to implement CV parsing and weighting features during the pre-screening stage, enhancing the recruitment process.
- Interfaced with Zoho suite APIs (CRM, Analytics, Books) and HERE APIs for geolocation functionalities.
- Used PostgreSQL, Apache Solr, and PrimeFaces for data management and front-end development.

Technologies: Java (PrimeFaces), PostgreSQL

LIMS Troubleshooting on Jakarta EE / MySQL
- Performed troubleshooting and maintenance on a LIMS based on Jakarta EE and MySQL.
- Provided support in resolving system issues and optimizing laboratory data management processes.

Technologies: Java (Jakarta EE), MySQL

Accounting Data Utility
- Developed a utility for processing accounting data integrated via API with the Zoho management system.
- Implemented automated Excel file generation for efficient data export.

Technologies: Python (FastAPI), Zoho API, Excel Automation

BACKEND DEVELOPER
2023
Service Lito S.N.C – Cremona, italy
- Developed a Python-based system for processing operational data from Xerox Versant 280 and Vulcan 40 machines.
- Designed the solution in compliance with regulatory requirements for eligibility under the Industry 4.0 tax incentive program.

Technologies: Python, Data Processing, Industry 4.0 Compliance

CO-FOUNDER AND HEAD OF R&D
2019 - 2023
Feeling Felt – Milano, Italy

Design and Development of Integrated Prototypes for Feeling Felt Accessories
Created accessories and components for bags, bracelets, and keychains through:
- 3D modeling using Fusion 360.
- 3D modeling using Blender.
- 3D printing with FDM (Filament) printers.
- 3D printing with resin printers.
